IMPORTANT GLAXOSMITHKLINE (GSK) PRODUCT RECEIVING/HANDLING AND STORAGE INSTRUCTIONS

Your package was shipped with a GSK TagAlert® Temperature Monitor from Sensitech Inc. Accordingly, the enclosed product has been shipped under the GSK recommended conditions.

RECEIVING/HANDLING INSTRUCTIONS - How to read the GSK TagAlert Temperature Monitor:

1. Open each shipping container immediately upon receipt. Remove the GSK TagAlert Temperature Monitor and check the display window immediately upon opening the container.
2. If "OK" is displayed (see Figure 1), the temperature inside the container has been maintained within the recommended range and the product is okay to use. Remove and discard the GSK TagAlert Temperature Monitor and any gel packs prior to refrigerating the product between 36°F and 46°F (2°C and 8°C).
3. If anything else is displayed in the GSK TagAlert window, e.g., black squares over an "OK" with or without the numbers 1, 2 and/or 3 (see Figures 2 and 3), OR if the display is blank, then the temperature inside the container deviated from the recommended range. Do not use the product. Immediately contact the appropriate department below for further instructions:
 GSK Vaccines Service Center at 1-866-GSK-VACC (1-866-475-8222), or
 Customer Relations at 1-800-877-1158
4. Discard any gel packs used in the shipment as well as the temperature monitoring device. At no time should the gel packs or the temperature monitoring device be reused.

CUSTOMER SHIPPING INSTRUCTIONS
FOR GLAXOSMITHKLINE (GSK) PRODUCT

GSK product shipments that are temperature sensitive must be shipped under temperature controlled conditions which maintain product label conditions and should adhere to the following guidelines:

1. **Shipping Containers** – Qualified shipping containers must be used that maintain the appropriate temperature range (as specified on product label). Specialized packing and additional thermal components should be utilized to ensure temperature control.

Note: Temperature controlled transportation may be used as a substitute to ensure GSK product maintain correct temperature.

CAUTION: Precautions must be taken to prevent this product from freezing. If frozen, the product must be discarded.

2. **“Do Not Freeze” Label** – Two-color, bright 4” x 4” stickers that read:

- ♣ Open Immediately
- ♣ Do Not Freeze
- ♣ Refrigerate Upon Receipt 36°F - 46°F (2°C and 8°C).

3. **Temperature Monitoring Device** should be included in all temperature sensitive GSK product shipments to ensure product integrity. When choosing a monitoring device, it must have the ability to alert the recipient of any temperature deviations outside of the range stated in the product labeling 36°F - 46°F (2°C and 8°C).
